

If, like most companies, you move data around between servers and databases, PDAs, smart phones, programs & browsers, as illustrated below and you are typically using FTP or ODBC then you *should* already know that this is not only an **unsecure** method but it is also a slow process that produces no audit trail.

RouteOne from our partner Uti400 changes that, which is why we are hosting a Free Webinar to illustrate how the power and flexibility of RouteOne can help you and your business.

For a brief product overview and to find out how and why you need to get involved in our free Webinar turn to the other side of this invitation.

Join Quattro For A Free Webinar

To Illustrate The Power And
Flexibility Of RouteOne

Why? Good question. Why should you use RouteOne from our partner Uti400?

There are several reasons why you should use RouteOne and whilst these will be covered in greater detail in our Free Webinar the **Key Facts** are highlighted below.

RouteOne will speed up your data transfers by up to **500%** compared to FTP/ODBC and sort, select, average and reformat data.

As well as that it has an **audit trail**. It can be **restarted** in the event of network failure.

Target any one (or more) of 20 different formats including CSV, Access, XLS, SQL, TXT & XML, Oracle & SQL server as illustrated above.

The source can be **anywhere** (network folder, FTP, email attachment in addition to servers / PCs). It **supports** one to many or many to one.

How do I get Involved? You can register for the event by visiting our website <http://www.quattroconsulting.co.uk/news/story/10/webinar-registration> or by using the direct link: <https://www1.gotomeeting.com/register/621171433>.

Alternatively call us on **07071 700 400** and we will help you register for the event as well as answer any questions you may have.

When is it taking place? Our **Free Webinar** will be hosted on Thursday **24th February at 3pm**.

How long will it take? Only **30 - 40 minutes** of your time.

Where do I need to be? Getting involved is **easy**. You (and your colleagues) can be part of the Webinar from the comfort of your own pc.

So why not grab a coffee and **join us?**
